LEARNING MOBILITY FOR YOUTH, EDUCATION AND EMPLOYMENT

Europemobility Network International Conference

Learning mobility and internationalization is gradually embedded within formal education systems as complementary measure to foster both personal and professional skills and competencies of learners. Learning mobility is increasingly perceived and more and more adopted as an effective measure to involve NEETs in practical experiences abroad. Learning mobility is an integral element of many youth programmes promoting empowerment via non-formal and informal education activities. Learning mobility is integrated within measures supporting the implementation of the Youth Guarantee.

The conference offers a unique opportunity to decision makers and practitioners to meet each other, discuss around successful initiatives and fine tune new programmes. The conference promotes synergies and exchange of experiences between educational providers active in different sectors (VET, HE and Non formal Education) and among decision makers with different portfolios (Youth, Employment, Education).

Participants benefit from the event by establishing synergies in terms of:

- Strategic planning and benchmarking successful programmes under European Social Fund, former Lifelong Learning Programme and Erasmus+ for **decision makers**
- Innovative solutions, tools and practical measures to implement learning mobility schemes for **practitioners**

The conference aims at providing professionals the marketplace for exchanging experiences and good practices in the adoption of transnational learning mobility for engaging youngsters and contributing to better educational and employment perspectives.

*Europemobility Network is an International Community of Mobility Coordinators, composed by over 240 members in 30 countries, active in VET, HE and Non Formal Education, representing over 500.000 learners, 50.000 staff members and 16.000 transnational exchanges per year:
www.europemobility.eu*

*Europemobility Network celebrates within the International Conference the Award Ceremony of the yearly Video Contest for mobile learners:
www.europemobility.tv*

Europemobility Network is supported by the Executive Agency for Education and Culture of the European Commission under the Lifelong Learning Programme.

LEARNING MOBILITY FOR YOUTH, EDUCATION AND EMPLOYMENT

16.00 – 16.15	Coffee break & networking exercise
	<i>Parallel Workshops</i> Second Round
17.30	Closure

Workshops Day 1:

Quality assurance in mobility

"Improving the quality of mobility...where do I start?"

It is clear that quality assurance (QA) is one of the most important issues and concerns when students go abroad to work and to learn. Not only in terms of safety and health, but also in terms of expectations, preparation and what the students can/will achieve in terms of competences and how they will be supervised and evaluated.

The workshop is built up from two points of view of quality Assurance in mobility: "micro" quality in the context of quality in mobility at operational/ implementation level and the "macro" quality in the context of the quality of the Erasmus+ programme as such.

The first session of the workshop offers an overview of the tools developed by Europemobility Network to support quality at micro level while within the second session participants have the opportunity to formulate comments and recommendations to the European Commission on critical aspects and on solutions to improve the implementation of Erasmus+.

Moderators: Thomas Berger, Eva-Maria Kropp (Inter-research e.V – Germany),

Pauline van den bosch (European Vocational Training Association – Belgium)

Case studies: Erasmus+ Quality Framework and Accreditation of Sending Organizations from the VET sector

Cooperation models for mobility

"How to build cross sectorial partnerships for learning mobility"

The workshop provides the opportunity to discover innovative models of cooperation among different stakeholders active in the field of learning mobility. Building on the experience of Regional Government of Cataluña, the workshop presents successful case studies and promotes a reflection among the participants on how public authorities can embed learning mobility as active measure within youth, education and employment policies. The workshop presents how public authorities, business representatives, different educational providers from Higher Education, VET and Non Formal Education can establish sustainable partnership for mobility.

Moderators: Stefano Tirati (CSCS – Italy), Rob van Wezel (KCH – The Netherlands)

Case studies: Regional Policy and International Cooperation on Learning Mobility presented by Angel Font (Generalitat de Cataluña)

Funding schemes for mobility

"How to benchmark and create synergies between EU programmes and national funding measures?"

In Europemobility, we have mapped over a hundred different European possible funding schemes supporting mobility in the different member states. The workshop on funding schemes promotes a reflection on how learning mobility schemes can be embedded within policy measures targeting NEETs in order to promote transition mechanisms from inactivity into employment or education. The workshops offers the experience of Sardinia Government on introducing transnational learning mobility among Youth Guarantee measures.

Moderators: Giovanni Cervioni (CBE – Belgium), John Gunnarsson (European Minds – Sweden)

Case studies: Youth Guarantee and Transnational Measures presented by Emanuela Atzori (Regional Employment Agency of Sardinia Government)

Impact of mobility

"How to measure the impact of learning mobility on Learners and Host Organizations?"

The workshop presents the findings of a major study conducted by the Finnish National Agency for Erasmus+ CIMO on how international skills and competences are developed through study or practical training abroad and how employers perceive international experiences accomplished by young candidates during their recruitment activities. Furthermore, the workshop presents the findings of research activities on the impact of learning mobility on mobile learners and on host organizations conducted by the Europemobility Network. Participants will be asked to comment upon the findings of the surveys and the studies and share their own views on the impact of mobility on learners and on host organizations.

Moderator: Giovanni Crisonà (CSCS – Italy)

Case studies: Impact Study conducted presented by Mika Saarinen (Director of CIMO, Erasmus+ Finnish National Agency; Impact Study conducted by Europemobility Network presented by Eva-Maria Kropp

Recognition of mobility

"Learning outcomes and European transversal competences in mobility"

The aim of the workshop is to share successful experiences, tools and methodologies for assessing, recognizing and validating learning outcomes acquired within transnational work placements and practical experiences abroad. ISFOL presents the activities accomplished in Italy by the ECVET Experts while participants have the opportunities to exchange views on solutions applicable both to formal and informal education settings.

Moderator: Geoff Scaplehorn (Efvet, Belgium)

Case studies: ECVET Italian Experts Team presented by Sveva Balduini, ISFOL

DAY 2: 26 September 2014

Venue: Teatro Massimo, via De Magistris 12, Cagliari - SARDINIA
